

ScaleLink Pro Product Management Software

Single or
multi-store scale
management

PART #	DESCRIPTION
--------	-------------

65231.....	ScaleLink Pro, version 3
------------	--------------------------

Sophisticated PLU management made simple. ScaleLink Pro joins individual scales to in-store computer/POS servers, as well as to central hosting computer networks.

Compatible with Windows® operating systems, ScaleLink Pro is loaded with features that simplify data management and product control.

Enter and maintain item data and price changes. Import and export ASCII delimited files for seamless integration and continued operation.

Set up zone pricing for multiple store locations to multiple scales. Automatic price distribution to all scales allows fast response to competitive pricing.

By using password protection and user profiles, store managers determine who can make changes who can simply view screens.

ScaleLink Pro is priced far less than similar PLU management software – yet with an array of reporting capabilities and powerful item updating tools, watching product movement has never been easier.

Applications
